→ HYPERBARIC OXYGEN THERAPY (HBOT)

HBOT involves breathing concentrated oxygen in a pressurized chamber to increase oxygen levels in the blood. This elevated oxygen supply enhances tissue repair and regeneration, reduces inflammation, increases circulation, and assists in the healing of chronic diseases. Additionally, HBOT is effective in treating decompression sickness and carbon monoxide poisoning, making it a versatile treatment for various medical conditions. An initial course of 20-60 hours is recommended, followed by monthly 60-minute maintenance sessions (dependent on patient and target treatment). Best outcomes are achieved by one session per week for 40 weeks, five sessions per week for eight weeks, or four sessions daily for two weeks.

HBOT SESSIONS

30-minute session	\$75
60-minute session	\$100
90-minute session	\$120
Bundle of 20 hours	\$1799
Bundle of 40 hours	\$3199
Bundle of 60 hours	\$4499

RECEIVE A FREE HBOT SESSION

60-minute session included with each skin, hair, or musculoskeletal rejuvenation therapy

NON-MEMBERSHIP RATES

Body Composition Analysis & Functional Measures	\$150

SKIN, HAIR, AND MUSCULOSKELETAL THERAPIES

→ LIQUIDUM AURUM THERAPY (LAT) ADVANCED PRP

LIQUIDUM AURUM THERAPY is scientifically proven to deliver the highest quality of platelet-rich plasma (PRP) therapy. Using a concentrated sample of platelets derived from the patient's blood, LAT injects plasma rich in growth factors to stimulate healing and tissue regeneration. This advanced PRP therapy promotes cellular repair, enhances skin elasticity, and potentially slows aging by boosting the body's natural repair mechanisms, helping maintain a youthful appearance and support overall vitality.

→ COLLAGEN INDUCTION THERAPY (CIT)

COLLAGEN INDUCTION THERAPY, also known as microneedling, involves using fine needles to create tiny punctures in the skin, stimulating collagen production. Benefits include improved skin texture, reduced scars, minimized fine lines, and enhanced skin elasticity. LAT + CIT are recommended as a combined service to enhance skin rejuvenation, maximizing the benefits of both treatments for optimal healing and results.

LAT INJECTIONS FACE OR SCALP

Single injection series	\$800
Bundle of four injection series	\$3000

LAT + CIT FACE OR SCALP

Bundle of four injection series	\$4200

LAT INJECTIONS KNEE SHOULDER OR TRIGGER POINT

Single injection series	\$900
-------------------------	-------

→ FRAXEL® DUAL LASER

THE FRAXEL® DUAL LASER is a skin resurfacing treatment that uses two types of laser technology to target both the surface and deeper layers of the skin. It effectively addresses a range of skin issues, including wrinkles, age spots, and acne scars, by stimulating collagen production and promoting cell turnover. The benefits of Fraxel® Dual Laser treatments include improved skin texture, reduced pigmentation, and a more youthful, radiant complexion with minimal downtime. Best outcomes are achieved with an initial course of 4-6 treatments every two weeks, followed by 1-2 maintenance treatments per year.

→ DAXXIFY INJECTIONS

DAXXIFY is a state-of-the-art neuromodulator injection designed to smooth wrinkles and fine lines by targeting the facial muscles responsible for expression lines. Daxxify uses a unique formulation to deliver longer-lasting results than traditional wrinkle relaxers, giving patients a refreshed, youthful appearance with effects that can last up to six months. This advanced treatment is ideal for reducing frown lines, forehead wrinkles, and crow's feet, offering a reliable, non-surgical solution for a smoother skin texture and luminosity.
